

YASH JAIN

FULL STACK ENGINEER

+91-8005956711

[LinkedIn Profile](#)

yash.jain.consults@gmail.com

Mansarovar, Jaipur, Rajasthan (302020)

SUMMARY

- Results-driven Full Stack Developer with 5 years of total experience (3.5 years full-time).
- Proficient in: React, FIGMA, Node.js, JavaScript, TypeScript, RPA(UiPath, Tricentis Tosca, Power Automate).
- Strong background in: Architecting full-stack solutions, Optimizing UI/UX, Backend service integrations and developing scalable high-performance web applications.
- Experienced in application modernization: Migrating legacy systems to modern web technologies, Transitioning to cloud-native architectures.
- Onshore experience in Dubai, working directly with the client team.
- Extensive experience working with global clients across the Middle East (Dubai, Saudi Arabia, Abu Dhabi), Australia, United States, Japan, and India, collaborating with distributed teams on enterprise-scale applications.

WORK AUTHORIZATION & READINESS

- Currently holding a valid **H-1B** visa sponsored by Celebal Technologies Americas Inc.
- H-1B validity: September 23, 2024 – August 15, 2027
- Open to H-1B transfer opportunities with prospective employers
- Open to international opportunities across multiple countries
- Willing to relocate globally and travel internationally as per business needs.

PROFESSIONAL SKILLS

- **Frontend:** React, Next.js, TypeScript, Redux, JavaScript, Tailwind CSS, Bootstrap, HTML, SCSS, CSS, FIGMA, Adobe XD
- **Backend:** Node.js, NestJS, Express.js
- **Databases:** MongoDB, MySQL, Azure SQL, Azure Blob Storage, Azure Cosmos DB, Lakebase Postgres
- **DevOps:** Azure DevOps, Docker, AWS, GitLab, Jenkins, GitHub
- **Azure:** Azure App Service, Azure Function App, Azure Logic Apps, Azure Web PubSub, Azure Entra ID, Azure APIM, Azure App Gateway
- **Authentication:** Azure MSAL, LDAP, OAuth, Amazon Cognito
- **Other:** GraphQL, REST APIs, Jest, Cypress, Playwright, Splunk, Databricks Apps, Wiz, Apiiro

CERTIFICATIONS

- **Microsoft:** Azure Administrator Associate (Az-104)
- **Microsoft:** Azure Fundamentals (Az-900)
- **Microsoft:** Security, Compliance and Identity (SC-900)
- **Microsoft:** Designing Microsoft Azure Infrastructure Solutions (Az-305)
- **Microsoft:** Designing and Implementing Microsoft DevOps Solutions (Az-400)
- **Microsoft:** Microsoft Certified Trainer (MCT)

EDUCATION

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE
Engineering College, Ajmer

(2018 - 2022)

12TH GRADE (PCM)
Bright India Public School, Ajmer

(2018)

10TH GRADE
Maheshwari Public School, Ajmer

(2016)

WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER

(August 2024 - Present)

Celebal Technologies Private Limited

- Led a team of **20+** developers, overseeing project architecture and technical execution.
- Designed and implemented cloud-native architectures for highly scalable applications hosted on Azure and AWS.
- Developed and optimized a Gen AI-based conversational platform with React.
- Built and integrated SSO authentication using Azure MSAL, OAuth, and LDAP.
- Successfully delivered **25+** projects across frontend, backend, and cloud-native architectures.
- Achieved over **2600+** billable hours in one year across multiple high-impact projects, consistently exceeding client expectations and receiving positive feedback for exceptional service delivery and innovation.
- Actively contributed to **40+** pre-sales, technical proposals, and solution architecture for large-scale projects.
- Created a centralized repository for React, consolidating all design components into a reusable library/package.
- Migrated monolithic applications to microservices-based architecture, enhancing modularity and deployment flexibility.

SOFTWARE ENGINEER ASSOCIATE

(August 2022 - July 2024)

Celebal Technologies Private Limited

- Trained **24+** developers in QA and automation of Tricentis Tosca and UiPath Tool.
- Optimized React component reusability, reducing development time by 30% across multiple projects.
- Implemented Azure DevOps CI/CD pipelines to automate testing and deployments.
- Integrated Azure Blob Storage and AWS S3 for secure and scalable file handling.
- Achieved over **2400+** billable hours in one year across multiple high-impact projects, consistently exceeding client expectations and receiving positive feedback for exceptional service delivery and innovation.
- Established and scaled Frontend, Full Stack, and AI/ML practices within the team, successfully growing it to **20+** highly skilled members, fostering technical excellence and continuous growth in cutting-edge technologies.
- Delivered over **5000+** billable hours dedicated to the Frontend practice, driving technical innovation, project success, and enhancing client satisfaction.
- Led successful pre-sales efforts, securing key projects with substantial billable hours, directly contributing to business growth and client acquisition.
- Automated CI/CD pipelines using Azure DevOps, improving delivery speed and reducing deployment errors.

SOFTWARE ENGINEER TRAINEE

(April 2022 - July 2022)

Celebal Technologies Private Limited

- Assisted in building a CRM dashboard with role-based access control.
- Developed and deployed containerized applications on Azure Kubernetes Service (AKS).
- Contributed to backend API development using Node.js and SQL Db.
- Developed an Employee Engagement Portal for cloud infrastructure and security, improving team collaboration and engagement. Additionally, played a key role in standardizing frontend development, creating a scalable framework that enhances consistency and efficiency across projects.
- Integrated monitoring and alerting tools like Dynatrace, enabling proactive system performance tracking.

SOFTWARE ENGINEER INTERN

(February 2021 - March 2022)

Celebal Technologies Private Limited

- Developed a responsive UI for an IoT-based dashboard using React and Bootstrap.
- Assisted in migrating a monolithic application to a microservices-based architecture.
- Automated data synchronization and API performance tuning.
- Worked with Azure DevOps and GCP DevOps to manage CI/CD pipelines.
- Monitored application performance using Dynatrace for error detection and optimization.
- Implemented Robotic Process Automation (RPA) solutions with UiPath and Microsoft Power Automate.
- Conducted automated testing and quality assurance using Tricentis Tosca and qTest.

PROJECTS

AI-POWERED CHATBOT PLAYGROUND (ONSHORE - DUBAI)

- A web-based platform that allows users to build, manage, and monitor AI chatbots. Admins can configure conversation prompts, manage users, upload documents, and analyze chat interactions. The system includes role-based access, usage logs, and prompt versioning. Real-time chat history and performance insights are available to improve bot efficiency.
- Tech Stack : React, Redux, TailwindCSS, MSAL (Azure Entra ID), Azure Blob Storage

API MANAGEMENT PORTAL (DPP3 TRADE API PORTAL)

- A self-service portal for managing, testing, and monitoring APIs within an organization. Allows developers to register APIs, generate API keys, manage usage quotas, and view detailed logs and analytics. Supports API documentation, version control, and role-based access for internal and external users. Integrates with gateway services for authentication and throttling.
- Tech Stack : React, Node.js, Azure Cosmos DB, MSAL (Azure Entra ID), Azure API Management

EMPLOYEE ENGAGEMENT PORTAL (TRACKIFY)

- A comprehensive portal designed to boost employee engagement and productivity. Features include revenue tracking, project management, resource management, timesheet management, resource utilization, pre-sales tracking. Admins can manage team roles, set permissions, and generate productivity reports. Enables smooth team collaboration and project transparency.
- Tech Stack : React, Redux, Material UI, Node.js, Express, MSAL (Azure Entra ID), Azure DevOps

INTEGRATION DASHBOARD (NEXUSONE)

- A centralized dashboard designed to monitor, manage, and visualize the status of various system integrations and APIs. It displays real-time statuses, error logs, success/failure metrics, and provides filtering based on tags like entity type, integration name, and status. Users can view detailed logs, retry failed integrations, and monitor key performance indicators (KPIs) related to integration health. Includes role-based access, notification alerts for failures, and audit logs for traceability.
- Tech Stack : React, Redux, SASS, MSAL (Azure Entra ID), Azure API Management, Azure DevOps, Azure Blob Storage, Jira, Azure App Service

TECHNOLOGY MANAGEMENT DASHBOARD (TECHRADAR)

- It serves as a centralized and structured platform to manage, track, and govern the organization's technology landscape. It provides a comprehensive view of applications, tools, frameworks, and platforms used across the enterprise, enabling better visibility and informed decision-making. The dashboard is designed to support recruiters, administrators, and technology stakeholders by offering streamlined workflows, intelligent insights, and role-based access. With integrated AI capabilities, it enhances operational efficiency through automation, monitoring, and data-driven recommendations.
- Tech Stack : React, Redux, Node.js, Material UI, MSAL (Azure Entra ID), Azure DevOps, GitHub, Copilot

AWARDS & ACHIEVEMENTS

- **Robotics Zonal Winner at IIT Delhi – Zonal Rank 2**, organized by IIT Delhi (2014-15)
- **CODETHON-21 National Level Hackathon Winner – Rank 4**, organized by Government Engineering College, Ajmer (2021–22)
- **CODE-N-Build 2.0 Global Level Hackathon Winner – Rank 3**, organized by JECRC University, Jaipur (2021–22)
- **H&H Conclave Hackathon Semi-Finalist – Participated**, organized by Rajasthan Technical University Kota and JECRC College Jaipur (2021–22)
- **AICTE Regional Level Chhatra Vishwakarma Hackathon Quarter-Finalist – Participated**, organized by AICTE, India (2021–22)
